DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. *The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided.* The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the form and phraseology often used in patent claims "said" is in the abstract, it should be avoided. Correction is required. See MPEP § 608.01(b).
3. The abstract of the disclosure is objected to because the abstract is too long. Correction is required. See MPEP § 608.01(b).

Claim Objections

4. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Claims 42 are objected to because of the following informalities: Claim 42 is duplicated. Appropriate correction is required.

Drawings

5. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

Allowable Subject Matter

6. Claims 28-41, 43-47 are allowed.

7. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or render obvious the claimed combination including registering an accelerator pedal signal being registered by an accelerator pedal position sensor; registering a rotation speed signal being registered by a rotation speed sensor; defining load conditions; determining a load-condition-dependent opening period of said gas outlet in compression chamber of each cylinder during compression stroke; determining a load-condition-dependent fuel injection quantity per work cycle and cylinder; and determining advance angles as a function of said load conditions.

Conclusion

8. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
